

BROAD SPECTRUM MULTI-SURFACE DISINFECTANT PRODUCTION STATION

A NEW PARADIGM FOR THE SAFETY OF YOUR EMPLOYEES, YOUR CLIENTS, AND YOUR LOVED
ONES IN THIS NEW PANDEMIC WORLD.

E2metrix Inc. has made it possible for companies and institutions to produce their own disinfectant on demand and onsite, to meet their important surface disinfection needs, using the E2mox™ Station.

The E2mox™ Station is an automated unit, which allows for the onsite production of OXWELL™, a ready-to-use (RTU), eco-friendly surface disinfectant (kills the human coronavirus in 60 seconds) with a unique “per-use” business model – a real paradigm shift in this domain.

OXWELL™ is produced safely, with renewable resources, using a patented electrotechnology which transformed water and salt using electricity. This transformation creates a stable solution which respects the environment at each step of the production process and in its usage.

THE ADVANTAGES OF THE E2MOX™ STATION

A COMPLETE PARADIGM SHIFT

For the safety of your employees, customers and ultimately family and friends.

SELF-SUFFICIENCY – Produce OXWELL™ onsite to address your new surface disinfecting needs in a COVID-19 world.

ATTRACTIVE FOR TIGHT BUDGETS – Dramatically lower costs vs packaged products, with the availability of a pay-per-use business model.

AUTOMATION & CONNECTIVITY – Automated OXWELL™ production with remote monitoring and minimal maintenance.

TWO STATION FORMATS, for small office building to large industrial usage-can customize throughput as needed.

ADDITIONAL FEATURES

Adaptable to all different electrical inputs (50/60 Hz, 1/3 ph, 110/240/ 480/600V)

Small footprint : 50 L/h < 4 m²

1,000 L/h < 20 m²

Can be containerized if required

oxwell™
DIN 02514176

THE BROAD SPECTRUM MULTI-SURFACE DISINFECTANT,
PRODUCED BY THE E2MOX™ STATION
AUTHORIZED AND LISTED BY HEALTH CANADA AGAINST COVID-19

SIMPLE, EFFICIENT AND SAFE

- ✓ 99,99% efficient against human coronavirus in 60 seconds
 - ✓ No protective equipment necessary
 - ✓ Does not irritate the skin or hands
- ✓ Does not emit toxic vapors, nor leave residues
 - ✓ No dyes, fragrances or additives
- ✓ Can be sprayed freely near people in open spaces
- ✓ Protective for people, for animals and for the planet

**ACTIVE INGREDIENT: HYPOCHLOROUS ACID 0.0367% W/W
READY TO USE (RTU) SOLUTION**

ABOUT E2METRIX :

E2metrix is a Sherbrooke, Quebec, Canada-based water and wastewater treatment systems company, with a focus on ECOTHOR®, a « plug & play » patented electrotechnology process (14 patents, 8 issued, 6 in process), for treating wastewater and industrial water. OXWELL™ is produced from a process derived from its award-winning ECOTHOR® Technology Platform, benefiting from the company's extensive innovation, design, fabrication and assembly capabilities – leading to the paradigm-shifting E2mox™ Station.
