

ELECTRODISINFECTION FOR COOLING TOWERS

ECOTHOR®-D

CHEMICAL-FREE DISINFECTION

ECOTHOR®-D is a simple to operate, chemical-free, cost-effective solution to bacteria elimination (including legionella) in at-risk water circuits such as those for cooling towers, hotel & hospital hot water systems, spas and other mist-generating applications.

- Up to 65% reduction in capital cost
 - vs chemical addition & filtration
 - vs pulsed electromagnetic field
- 40-75% reduction in operating & maintenance costs achievable
- Large reduction in water consumption, while making available residual water for re-use
- Reducing biofilm and scale formation
- Remote monitoring available
- For new installations and retrofits

Patented Pending System using E2metrix's ECOTHOR® Electrotechnology Platform

For Facility Managers, HVAC Integrators,
Engineers & Green Building Specialists
involved with the following installations:

- Office Buildings
- Convention Centers
- Hotels
- Long-term Care Facilities
- Hospitals
- Spas

Legionella pneumophila

BEFORE
> 10,000 CFU/L

AFTER
<< 3,000 CFU/L
(Below detectable limits)
